UNCLASSIFIED//FOR OFFICIAL USE ONLY

EOC Daily Emergency Management Report

Date: 11/27/2019
Time: 10:49 AM
Report Number: 19-230

Alerts & Warnings

FEMA National Watch Center (NWC): Steady State, Monitoring (24/7)

Continuity of Operations (COOP): COGCON Level 4

EPA HQ Emergency Operations Center (EOC): Level 3 (Steady State).

Regional EOCs: All Regions are operating at Steady State.

EPA Headquarters Activities

EPA HQ Emergency Operations Center Activation Team: Blue Team is scheduled through November 30, 2019.

EPA National Incident Management Assistance Team (N-IMAT): Regional Grouping #3 is scheduled through November 30, 2019.

ASPECT (Airborne Spectral Photometric Environmental Collection Technology): ASPECT is fully operational and located in Addison, TX from November 25 – December 2, 2019.

CMAD Lab Assets (OEM/Consequence Management Advisory Division):

The internal generator in the PHILIS SPA sample prep trailer from the Castle Rock, CO warehouse is operational. Additional testing will continue this week to ensure reliability. The electrical system in Edison, NJ, Bldg. 209, is undergoing upgrades. As such the power to the PHILIS fixed lab LC/MSMS system will be down until Jan 5, 2020. All other CMAD's PHILIS mobile laboratory vehicles and assets are fully functional and ready for deployment and response support from their respective lab and warehouse locations at Edison, NJ and Castle Rock, CO. All CMAD fixed chemical laboratory assets are fully functional and ready for response support. For biological agent analysis and related response support, please contact CBRN CMAD.

ERT (OSRTI/Environmental Response Team): Available for deployment: ERT TAGAs (Edison, Las Vegas, and RTP). Mobile Command Posts & HazMat trucks (Las Vegas, RTP, Edison and Erlanger) Deployed: Mobile Analytical Lab, Edison, to Minden, WV.

Significant National Weather

The National Weather Service (NWS) reports that two powerful storms continue to impact much of the central/western U.S. The storms are expected to bring heavy snowfall to portions of the Northern Intermountain, Northern/Central Rockies, Central Great Basin, Upper Mississippi Valley, and the Great Lakes. Severe thunderstorms, damaging winds, and isolated tornadoes possible for the Southern Plains, Lower Mississippi and Tennessee valleys. In southern CA, heavy rain could bring flash flooding and mudslides to burn areas.

Firefighters in Santa Barbara County, California are battling the Cave fire, which ignited Monday, November 25. The fire is currently 0% contained. On November 26, two fires ignited in Oklahoma – the Gage Fire and Highway 50 Fire.

Report of Incident Notifications

Region 6, Explosion at TPC Facility

Early in the morning on November 27th, the National Response Center received a report about an explosion at TPC Facility in Port Neches, TX. The explosion was felt for miles around with damages and an evacuation zone was established. An EPA Region 6 OSC and START are mobilizing to the scene. ASPECT has been deployed.

Exercises/Pre-Deployments

Nothing significant to report.

Reported Activities (11/26/19 – 11/27/19)

 Yesterday's Hotline Log Reports						
Region 		Oil	Hazmat	Radiation	Other	Totals
Region 1		1	0	0	0	1
Region 2		2	0	0	1	3
Region 3		0	0	0	2	2
Region 4		15	1	0	3	19
Region 5		5	4	0	2	11
Region 6		7	3	0	0	10
Region 7		0	0	0	1	1
Region 8		1	1	0	0	2
Region 9		2	1	0	1	4
Region 10		1	2	0	1	4
Totals		34	12	0	11	57
